

# Is It Better to Walk or Run in the Rain?

## VOCABULARY

- \***Parallelepiped** – a solid with six faces, each of which is a parallelogram
- \***En route** (*to a place*) – means on the way to that place
- \***Snowplow** – a vehicle which is used to push snow off roads or railroad tracks

## COMPREHENSION

1. What is the rate of rain hitting the top of your head? How does your speed of walking affect this?
2. How do you calculate your total wetness?
3. In the end, which keeps you drier when moving in the rain: walking or running?

## LET'S TALK

1. Do you usually take your umbrella with you when you're out?
2. If you're out but you don't have your umbrella with you and it's raining, do you wait till the rain stops or just ignore the cold rain and get drenched?
3. What are other examples of how science informs us on how we react to the weather?
